

Claims Status

1. (Currently Amended) In combination with a door assembly having an inwardly pivoting door mounting in a casing assembly between a room area and a hallway area, said door having spaced interior and exterior surfaces and a horizontal top surface wherein a limited clearance space is provided between the top and exterior surfaces and the casing assembly, a folding pendant display comprising: an inverted U-shaped hanger member ~~plastic hanger~~ having a thickness less than said limited clearance space, said hanger member having an upper section engaging the top surface of the door and spaced front and rear sections slidably overlying the exterior and interior surfaces of the door; a support holder formed of a single piece of plastic having a planar rear surface attached to said front section of said hanger member below the adjacent casing assembly whereby the door may be opened and closed with the hanger member and support holder thereon, a spherical socket formed in said support holder, a downwardly extending insertion aperture formed vertically in said support holder member and intersecting said socket along a vertical ~~ball~~ insertion position; a pendant pole having an elongate cylindrical shaft and spherical ball member ~~end-caps~~ formed at one ~~either~~ end thereof, ~~one of~~ said ball member ~~end-caps~~ being inserted through said aperture at said vertical insertion position and universally supported at said socket; snap fitting means integrally formed on said support holder adjacent said socket for receiving and retaining said ball member ~~one of said end-caps~~ with a snap-fit; a pendant member ~~formed of sheet material~~ having an upper end suspended by said shaft ~~a pocket formed in the upper end thereof in which the shaft is received for suspending said~~ pendant; a vertically upwardly and forwardly opening slot formed in said

holder and registering with said socket for accommodating pivotal movement of said pole from said vertical insertion position to a horizontal position for displaying said pendant in said adjoining hallway area.

2. Canceled

3. (Currently Amended) The pendant display ~~device~~ as recited in claim 1 2 wherein said hanger member is an inverted U-shaped thin wall plastic strip having spaced front and rear surfaces slidably disposed over the exterior and interior surfaces of the door.

4. (Withdrawn) The display device as recited in claim 2 wherein said hanger member is a flexible fabric draped over said door and having weighted members on the ends thereof.

5. (Currently Amended) The pendant display ~~device~~ as recited in claim 3 wherein said pendant member is formed of a flexible sheet having an upper pocket formed therein through which said shaft ~~pole member~~ is received.

6. (Currently Amended) The pendant display ~~device~~ as recited in claim 5 wherein said shaft ~~pole member~~ has an enlarged other end for retaining said pendant member thereon.

7. Canceled
